

# ShotPut Pro®

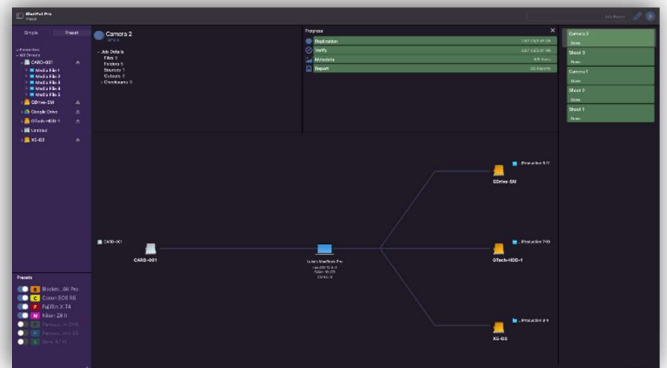

## Media Offloading Application

Since 1991, Imagine Products has helped digital video professionals (and beginners) back up, view, organize, share, transcode, and archive their irreplaceable work.

***ShotPut Pro is a media offloading application for Mac and Windows users. Create secure copies of camera cards or volumes to one or multiple locations. Name and define new folders for each job or add files to existing folders.***

- Copy process redesigned for today's faster media such as SSD's, NVMe, RAID's etc..
- Includes camera SDKs for Sony Venice, most with the M1 Silicon Chip optimization and latest Codex routines
- Additional verification options including: XXHashH3-128, XXHashH3-64, and C4.
- Preset mode allows for a streamlined workflow
- Text, email and desktop notifications
- PDF reports with thumbnails and metadata
- Powerful pause/resume function has been added
- Language options for Spanish or Simplified Chinese
